

Function Code Overview

A function represents a general operational area in a school district and groups together related activities. Most school districts use all the functions in the process of educating students or organizing the resources to educate students. For example, to provide the appropriate atmosphere for learning, school districts transport students to school, teach students, feed students and provide health services. Each of these activities is a function. The *R* by a function indicates that the function is required for reporting purposes (PEIMS and/or Annual Financial and Compliance Report).

Function	Description
